

# The project plan

To build a web shop site

Hassan Boazar

## Initiation

The idea to create an online store that selling handmade jewelry and accessories.

## Planning

Goal: The website should be basic and easy to reach and make the customers do shopping in a fast and safest way.

- \* Website Content (images, videos, texts) should be in good quality.

Advertisement: Since the website will be developed in e-commerce is necessary to use web authoring software to complete the task. Adobe products or adobe Photoshop or illustrator for graphic advertisement purposes.

- \* Prepare to troubleshooting and monitoring in case there are any problems that might occur during the process.

- \* The template design would be changed to planned way that I want.

## Design & Content

Start to work on providing the graphics and the building of the site.

Colors: colors will be mixed with both warm and cold colors.

Font: Basic font that make it easy to read for costumer. Arial is will be the main font.

Images and Videos: All pictures of the product will be captured by my colleague camera.

## Project timing

Needed to have projects done in a sufficient amount of time in case the unexpected happens.

This website set up one month to finish all the tasks.

I believe that I must have a patient!

The best possible work there needs to be some leniency with the process. After all no human is perfect.

Prepair for last minute scheduled activities.

## monitoring

Each task need to be checked for any possible errors, if they are already have errors then it is required a discussion to determine what the problem is and how to fix it.

Issue status report

## Budget

- Manage and track the costs.

## closing

- Prepare to the final project reports.
- Document lessons learned.
- Close the project.
